

Elahe Yousefi

Frontend Developer | React.js | TypeScript

Email | +98 911 900 0170 | [GitHub](#) | [linkedin](#) | [Portfolio](#)

Iran | Open to Remote Opportunities

SUMMARY

Frontend Developer with **3+ years** of professional experience building production web applications with React.js and TypeScript. Experienced in reusable components and custom hooks, REST integration, real-time data interfaces, performance optimization, and end-to-end testing with Playwright. Currently contributing to an **international** railway technology platform used by real-world operators.

WORK EXPERIENCE

Frontend Developer | PantoHealth International (Germany)

[pantohealth.com](#) | [dash.pantohealth.com](#)

Jun 2024 – Sep 2026

- Develop and maintain production frontend applications across multiple PantoHealth projects and environments using React.js, TypeScript, Chakra UI, React Query, Redux, REST APIs and Vite.
- Developed and maintained a shared React/TypeScript package using GitHub Packages, including versioning and releases, enabling reusable functionality across multiple frontend projects.
- Engineered authenticated video streaming by intercepting video-element requests in a Service Worker to inject auth tokens, enabling native HTTP range-seeking and removing full-clip downloads.
- Rebuilt real-time signal charts on a single HTML canvas rendering engine, coalescing pointer, zoom, and video-playhead updates into one animation frame to eliminate per-frame SVG rebuilds; virtualized long chart lists with TanStack Virtual.
- Led incremental migration of a 400+ file app from styled-components to Chakra UI v3, JavaScript to TypeScript, and Formik to React Hook Form; fixed an unbounded video memory leak and stale-closure bugs to improve stability.
- Bootstrapped a separate internal monitoring dashboard from the ground up: authentication, user/device/company management, and responsive layouts, wiring each page to the backend.
- Write E2E tests with Playwright, review pull requests, and collaborate within a five-person frontend team with backend, UI/UX, QA, and product.

Frontend Developer | Raspina Company | Vasiat Negar

May 2023 - Apr 2024

- Owned frontend development as the sole frontend developer for an early-stage startup, building the product interface with React.js and Material UI.
- Built responsive forms and interfaces, integrated APIs, and implemented authentication flows.
- Established reusable frontend components and responsive patterns as the product was developed from its initial stage.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Next.js, HTML5, CSS3

State & Data: Redux, Redux Toolkit, React Query, Context API, REST APIs, GraphQL

UI & Visualization: Chakra UI, Material UI, Tailwind CSS, D3.js

Testing & Tools: Playwright, Git, GitHub, Vite, WordPress, Figma

Practices: Responsive Design, Component Architecture, Custom Hooks, Code Review, Refactoring

EDUCATION

B.Sc. Cellular and Molecular Biology (Microbiology)

Azad University, Gorgan, Iran | 2014 – 2018

LANGUAGES

English - Advanced | Persian - Native
